Phone: (+1) 6692724141

Research Interests

Large Language Models (LLMs), Reinforcement Learning, Prompt Engineering, Deep Learning, Robust Machine Learning, Statistical Inference, Compression, High-dimensional Statistics & Information Theory

Education

University of Illinois at Urbana-Champaign (UIUC) 2017 – 2023
Ph.D. in Electrical and Computer Engineering 3.97/4.0

Indian Institute of Technology Madras (IIT Madras) 2012 – 2017
B.Tech. & M.Tech. in Electrical Engineering 8.81/10.0

Professional Experience

Coordinated Science Laboratory, UIUC
Postdoctoral Research Associate – Urbana, US June 2024 – Aug 2025

- Developed a novel automatic prompt generator with Lav Varshney which gives user the control to tradeoff between different objectives.
- Developed a novel RL policy optimization algorithm for multi-objective model alignment and prompt optimization.

Amazon
Research Scientist Intern – Remote, US May - Aug 2021

- Identified relevant features using windowed statistics for the problem of online defect identification to improve erroneous responses of Alexa's NLP model.
- Built a pandas framework for creating training data by extracting aforementioned statistics from the vast Alexa utterances data, and analyzed machine learning models trained on collected features.

Tata Institute of Fundamental Research (TIFR)
Junior Research Fellow – Mumbai, India May – July 2015

- Conducted research under the mentorship of Rahul Vaze and developed an online algorithm to improve energy efficient packet scheduling with provable guarantees.

Phasorz Technologies (MediBuddy)
Android Development Intern – Chennai, India March – July 2014

- Developed the XMPP and SQLite framework of DocsApp (now MediBuddy) - an android based messaging and consulting platform for patients and doctors.

Fellowships & Achievements

- Mavis Future Faculty Fellowship (conferred by UIUC) 2021
- Joan and Lalit Bahl Fellowship (conferred by UIUC) 2021,2022
- Dr. Ok Kyun Kim Fellowship (conferred by UIUC) 2019
- All India Rank 599 in IIT-JEE among half million applicants 2012
- Selected for KVPY Scholarship (SX Stream) by IISc 2011

Programming Skills

Python (including PyTorch, scikit-learn, pandas, cvxpy), Java
Matlab (including SDPT3)

Selected Research Projects

Multi-objective Prompt Optimization and Alignment in LLMs

- Developed prompt optimization techniques and architectures for multi-objective optimization which allows the user to control the trade-off between different objectives.
- Designed robust and efficient reinforcement learning policy optimization algorithms to optimize single and multiple objectives.
- Applications: *Automatic prompt generation, Learning from Human Feedback (LHF).*

Distributed and Adaptive Feature Compression

- Proposed an efficient adaptive scheme using deep neural networks for optimizing data compression in distributed sensor network without compromising performance of downstream task.
- Applications: *Internet of Things (IoT) devices, edge computing.*

Robust Estimation

- Designed a computationally efficient, outlier-fraction agnostic, optimal estimator for the problem of robust mean estimation.
- Applications: *Robust federated learning, robust LDA, robust linear regression.*

Hypothesis Testing in Multi-Armed Bandits

- Formulated a general framework of hypothesis testing which encompasses identification problems (e.g. top-k arms identification) in multi-armed bandits, and proposed an asymptotically optimal policy for quickest detection.
- Applications: *Medical diagnostic systems, recommendation systems, clinical trials, A/B testing.*

Selected Publications

- Multi-objective Prompt Optimization at the Information-Theoretic Limit
  A. Deshmukh and L. Varshney [full paper under preparation]
  Accepted in AAAI 2024 Fall Symposium on Integrated Approaches to Computational Scientific Discovery (AAAI Fall Symposium 2024)

- Distributed and Rate-Adaptive Feature Compression using VQ-VAEs
  A. Deshmukh, V. Veeravalli, and G. Verma [arXiv]
  Accepted in 58th Asilomar Conference on Signals, Systems, and Computers (Asilomar 2024)

- Robust Mean Estimation in High Dimensions: An Outlier Fraction Agnostic and Efficient Algorithm
  A. Deshmukh, J. Liu, and V. Veeravalli [arXiv]
  IEEE Transactions on Information Theory (2023)

- Robust High-Dimensional Linear Discriminant Analysis under Training Data Contamination
  Y. Shi, **A. Deshmukh**, Y. Mei, and V. Veeravalli [IEEE Xplore]
  IEEE International Symposium on Information Theory (ISIT 2023)

- Information Flow Optimization for Estimation in Linear Models Using a Sensor Network
  A. Deshmukh, J. Liu, V. Veeravalli, and G. Verma [IEEE Xplore]
  IEEE Signal Processing Letters (2023)

- Sequential controlled sensing for composite multihypothesis testing
  A. Deshmukh, S. Bhashyam, and V. Veeravalli [arXiv]
  Sequential Analysis (2021)

- Information Flow Maximization in Inference Networks
  A. Deshmukh, J. Liu, and V. Veeravalli [arXiv]
  IEEE International Conference on Acoustics, Speech, and Signal Processing (ICASSP 2020)
